SUMMARY

Frontend Developer with **4+ years of experience** specializing in **React**, **TypeScript**, and **JavaScript**. Skilled in application performance optimization, including code splitting, lazy loading, memoization, and efficient data handling. Experienced in building offline-first features using **IndexedDB** and **LocalStorage**, writing tests with **Jest** and **React Testing Library**, and delivering features end-to-end from **Figma** designs to production. Comfortable working independently in remote Agile/Scrum teams.

TECHNICAL SKILLS

CSS
HTML
JavaScript
Adaptive layout
React
TypeScript
TailwindCSS
React Testing Library
Jest
Redux
React Router
IndexedDB
Material UI
Node.js

SOFT SKILLS

Remote Collaboration
Self-Organization
Problem Solving
Product Thinking
Proactive Communication

EDUCATION

Bachelor of Science in Advertising Management 09/2018 – 06/2021
Ural State Economic University

LANGUAGES

English: Intermediate
(Limited Working Proficiency)
Russian: Native

EXPERIENCE

April 2024 – Present
Frontend Developer *(Remote)*
CleanTalk Inc

Projects:
DoBoard: Corporate task and project management platform.
Spotfix: On-page feedback and annotation tool for website editing.

- Developed responsive UI features based on Figma designs, maintaining consistency and usability across the application.
- Improved application performance by approximately 20% through code splitting, lazy loading, memoization, and other optimization techniques.
- Implemented IndexedDB for local data storage, enabling offline-first functionality.
- Maintained and extended a browser extension, ensuring seamless integration with core product features.
- Reviewed code, fixed bugs, refactored components, and improved APIs while independently delivering features within a remote Agile/Scrum team.

Feb 2024 – April 2024
Frontend/Full-stack Developer *(Upskilling)*
Itransition Group

September 2021 – October 2022
Frontend Developer *(Remote)*
Sber

Project:
Internal web platform for managers and brokers, featuring analytical dashboards and financial tracking tools.

- Built complex user interfaces for the “Manager’s Workspace” module, enabling real-time KPI monitoring and goal setting based on Figma designs.
- Expanded the internal UI component library, adapting and enhancing reusable components to maintain visual consistency across the platform.
- Optimized frontend-backend interactions by participating in REST API design and reducing redundant network requests, leading to smoother dashboard performance.
- Ensured application reliability and accessibility, focusing on UX details and writing unit/integration tests with Jest and React Testing Library.
- Maintained a strictly typed codebase using TypeScript, which helped minimize bugs and improved the speed of developing new features.
- Collaborated within a cross-functional Agile team (analysts, backend, QA), delivering consistent updates in a fully remote environment.
